### **E-Z Punch Inspection System Delivers Business Benefit to Construction Industry Clients**

Atlanta, Georgia, March 01, 2006 – E-COMM Corporation, Inc. (E-COMM), a leading Architectural, Engineering and Construction (AEC) software and service provider of construction project inspection systems announced that its customers are gaining tangible business benefits by automating construction project inspection performance, inspection reporting and subcontractor management processes.

E-COMM Corporation delivers business value by offering E-Z Punch, an extensive and customizable inspection automation solution aimed at the commercial and residential construction marketplace. The E-Z Punch inspection solution is targeted to quality assurance teams within a Property Developer, General Contractor, Architectural and Trade Subcontractor companies.

E-Z Punch can be used to streamline inspection processes and construction personnel management. The solution can deliver business benefits consisting of the elimination of inspection paperwork, decreased project turn-over time, reduced construction project costs, the elimination of “re-do” costs and decreased personnel management costs.

Charles Hudgens, of Vestcor Construction Services, located in Jacksonville, Florida states, “Before deploying E-Z Punch as our project’s inspection automation solution, I would have inspection reports in a stack on my desk over a foot high. Now with E-Z Punch, the reports we produce to manage quality and subcontractors is only 2 inches thick. In terms of simplifying quality reporting and subcontractor management while improving quality, you can do the math”.

The E-Z Punch solution consists of technologies that include PDA software operating on Palm and Pocket PC devices, PC desktop technology, report generation, fax and e-mail based communications, Web-based systems and wireless. This unique combination of technologies combined with the company’s customer service and training programs enables its customers to gain considerable return on investments in the solution coupled with increased building production performance.

For more information about the E-Z Punch inspection solution, E-COMM Corporation can be reached in Georgia at +1-850-345-1817 or via e-mail on the web site at [www.e-zpunch.com](http://www.e-zpunch.com).

### **About E-COMM Corporation**

*In 1998, E-COMM Corporation, Inc. was formed to focus on designing and delivering mobility enable applications and technologies to small, medium and large Corporations. After recognizing the Architecture, Engineering, Construction and Owner/Operator (AECO) industry need for inspection and quality management solutions, in 2006, E-COMM Corporation acquired the technology ownership rights to the E-Z Punch Inspection System solution. The E-Z Punch inspection solution’s focus is to improve construction project management, reduce operational costs, reduce paperwork, improve construction project quality that enable faster project turnover at a lower cost. Exploiting such technologies as Microsoft Windows, Palm Personal Digital Assistants (PDAs), and Internet-based technologies, E-COMM Corporation re-introduced the E-Z Punch into the construction industry as a “Turn-Key” inspection management solution. The E-Z Punch Inspection System has been utilized on high profile construction projects including the St Regis San Francisco Hotel and Condominium project, the Wynn Las Vegas Resort hotel project, the Hyatt Denver Convention Center Hotel project and numerous Multi-Family, Commercial, and University Housing Projects.*
